

I claim:

1. A dental hygiene tutorial toy comprising:
 - a body constructed in a child friendly configuration, said body containing an interior cavity therein;
 - a sound generation device disposed within said interior cavity of said body;wherein said sound generation device provides prerecorded instruction on proper dental hygiene.
2. The dental hygiene tutorial toy of claim 1 further comprising a timer integrated into said sound generation device; wherein said timer providing notification of proper duration for brushing teeth.
3. The dental hygiene tutorial toy of claim 1, wherein said sound generation device further comprising a speaker, a power source, and an activation mechanism.
4. The dental hygiene tutorial toy of claim 4, wherein said activation mechanism is integrated within said body constructed in a child friendly configuration.
5. The dental hygiene tutorial toy of claim 1 further comprising an electronic randomizer electronically integrated within said sound generation device, wherein said electronic randomizer provides the prerecorded instructions in a random order.
6. The dental hygiene tutorial toy of claim 1 further comprising:
 - a base attached to said body;
 - a slot disposed in said base, said slot sized to accommodate a toothbrush; and
 - a recess disposed in said base, said recess sized to accommodate a drinking cup.

7. A method of instructing children in proper dental hygiene comprising the steps of:

- providing a dental hygiene tutorial toy in a child friendly size and configuration;
 - installing a sound generation device within said dental hygiene tutorial toy;
 - recording a number of timed child appropriate instructions on proper dental hygiene on said sound generation device; and
 - providing a means for activating said sound generating device.
8. The method of instructing children in proper dental hygiene of claim 7 further comprising the step of:
- electronically integrating a timer within said sound generation device; wherein said timer provides information on the proper length of time for brushing teeth, and notification of the actual time brushed.
9. The method of instructing children in proper dental hygiene of claim 7 further comprising the step of:
- attaching a base to said dental hygiene tutorial toy;
 - disposing a slot in said base, said slot sized to accommodate a toothbrush;
 - forming a recess in said base, said recess sized to accommodate a drinking cup.
